Business Insights & Recommendations

Insight 1 — Revenue Performance

Total revenue generated from the platform is approximately 16 million, indicating strong sales activity across the marketplace.

Insight 2 — Top Product Categories

Categories such as Beauty & Health, Watches & Gifts, and Bed & Bath products generate the highest revenue, suggesting strong customer demand in lifestyle and personal care segments.

Insight 3 — Payment Preference

The majority of customers prefer credit card payments, which account for the largest share of transactions.

Insight 4 — Customer Satisfaction

The average customer rating of 4.09 indicates generally positive customer satisfaction with products and delivery services.

Insight 5 — Geographic Sales Distribution

Sales are concentrated in a few key states, highlighting potential regional markets for targeted marketing strategies.

2. Add Business Recommendations:

Recommendation 1
Increase marketing campaigns for top-performing categories such as Beauty & Health and Watches to further boost revenue.

Recommendation 2
Optimize logistics and delivery operations in high-sales states to improve delivery speed and customer experience.

Recommendation 3
Enhance promotional offers for alternative payment methods to diversify payment usage beyond credit cards.

Recommendation 4

Although the average rating is high (4.09), analyzing low-rated products and customer feedback can help identify quality issues and improve the overall customer experience. Since customer acquisition costs are high in e-commerce, implementing loyalty programs, reward points, and targeted email campaigns can encourage repeat purchases and long-term customer relationships.
